Calder Stewart

9 Ashford Avenue Newland

Canterbury

Attention: Chris Roche

Dear Chris,

Re: Proposal for Stormwater Maintenance at DSM6025 - NZ Dairy - 9 Ashford

Thank you for the opportunity to forward this proposal to maintain the storm water devices at the above-mentioned site. The maintenance of these devices is critical for effective treatment of storm water runoff. Dutton Stormwater specializes in all aspects of storm water maintenance and ensures your devices operate to their full capacity thus solving the following elements:

- Compliance of Resource Consent requirements with local and regional Councils (if applicable)
- Reduces risk of drain blockage and potential damage to property.
- The sumps trap fine particles from run-off. It is important to get these cleaned regularly to minimise contaminants discharging to our waterways

Please find below our pricing and terms to carry out the stormwater maintenance at your site.

PLEASE NOTE:

1. Price includes (unless stated otherwise): Disposal at an approved council facility, travelling to and from site, Confined Space Entry and Equipment, full report for all devices.
2. Prices include allowance of a 150 mm of silt on the vault floor. If levels are higher than this, extra disposal and service time charges may apply.
3. Device type may be subject to change based on technicians assessment. If this occurs, Customer will be notified of change and price.

If you wish to proceed please review the terms of the agreement and accept below. We will then be in contact with timings for service.

I look forward to hearing from you.

Kind regards,

Grant Buckingham
