Asbestos Identification Analysis Report

Client: Harcourt Insulation (2006) Ltd
Contact: Michele Hindle
office@insulation.co.nz

Report No: 83254-9655 v1
Date Received: 2/04/2026
Date Reported: 2/04/2026
No of Samples Received: 1

Client Reference: PO 27947

Sampling Address: 59 Newtown Street, Bromley, Christchurch 8062

Sampling Information: The samples were collected by yourselves (or your agent) and analysed as received at the laboratory. Chemsafety does not take responsibility for the sampling procedure or accuracy of sample location description as these have been provided by the client.

Analysed at: Chemsafety, 2b 303 Blenheim Road, Christchurch 8041

Sample Storage Information: Samples are held at the laboratory for 3 months after reporting. Once the storage period is completed the samples are discarded unless otherwise advised by the client.

Analysis Results

Analysed in accordance with the Australian Standard AS 5370:2024 - Sampling and qualitative identification of asbestos in bulk materials (ISO 22262-1:2012, MOD). Analytical technique used: Polarised Light Microscope, including Dispersion Staining Technique.

Limit of Reporting: 0.01% w/w
